Employment Training Panel Approves Over \$10.3M to Train California Workers and Expands Research and Marketing Efforts

SACRAMENTO – The State of California’s Employment Training Panel approved 39 contracts worth over \$10.3M in job training funds at its regularly held public meeting today. Proposals approved included small business and smaller scale projects under \$100,000 each. Training proposals included both single employer contracts as well as multiple employer contracts and were representative of various industry sectors throughout the state. The projects approved also included a significant number of new workers related to new and expanding facilities in California.

As a result of recent economic growth, the availability of training dollars in the Employment Training Fund (ETF) has increased, resulting in a larger appropriation this fiscal year than in the past.

“We are trying to get the word out to the employer community that we are open for business and have training resources,” said Barry Broad, Chair of the Employment Training Panel. “In this Fiscal Year alone we still have over \$60M available.”

In an effort to increase the potential pool of applicants, ETP has begun to expand its research and marketing efforts.

ETP is a business and labor supported state agency that assists employers in strengthening their competitive edge in the economy by providing funds to partially off-set the costs of necessary job skills training. California’s ETP is a performance-based program, providing funds for trainees who successfully complete training and are retained in good-paying jobs at or above a required wage base, for at least 90 days.

The program, funded by the Employment Training Tax paid by California employers, helps businesses threatened by out-of-state and international competition. The Panel also serves employers under its Special Employment Training Program, funding projects designed to improve skills and employment security of frontline workers in projects that do not meet standard employer/trainee eligibility requirements. Since its inception in 1983, the ETP program has provided approximately \$1.25 billion to train over 800,000 workers for more than 78,000 California companies. Employers match training funds awarded by ETP, making these projects true public-private partnerships. For more information about the program, please visit www.etp.ca.gov, or call 916-327-5368.
