

CERTIFIED SAFETY TRAINING

- Three certified training programs with specific safety content are approved for ETP funding.
 - OSHA 10/30
 - HAZWOPER
 - HAZMAT
- The 50% cap on total CBT hours does not apply – all hours of CBT or classroom training are approved for funding as required to obtain or retain certification.
- Although field work may be a requirement for certification – **no field work will be funded by ETP.**
- All OSHA 10/30 and HAZWOPER coursework and instructors must be approved and certified by Cal-OSHA.
- All HAZMAT coursework and instructors must be approved and certified by Caltrans or another government entity.
- The 10% limitation on safety training does not apply.
- The trainer-to-trainee ratio for Class/Lab training is 1:40.
- Single employers are eligible. However, training must be ancillary to other job skills training identified in the curriculum. This requirement is applicable to the curriculum as a whole and is not applied on a per-trainee basis.
- MEC participating employers are eligible and the curriculum may consist entirely of OSHA 10/30 or HAZWOPER/HAZMAT courses.
- The 20% limitation on training for managers/supervisors may apply, unless an exemption is justified in the ETP130.
- All OSHA 10/30 and HAZWOPER/HAZMAT training should “stand alone” in the curriculum as a separate type of training.
- Requests to add OSHA 10/30 and HAZWOPER/HAZMAT training to an existing ETP contract may be processed as a modification or in-house amendment

For further information regarding this Pilot program, please contact [ETP's Economic Development Unit](#), or call 916-327-5258.
